Complete the answers to the questions below to complete your project report.
Create a PDF of the completed document and submit the PDF with your project.

Question	Your answer:
Step 2: Domain Choice What domain did you choose to fine-tune the Meta Llama 2 7B model on? Choices: <ol style="list-style-type: none">1. Financial2. Healthcare3. IT	I choose the IT domain.
Step 3: Model Evaluation Section What was the response of the model to your domain-specific input in the model_evaluation.ipynb file?	The response of the model was: Traditional approaches to data management such as > relational databases are unable to cope with the complexity of the data and the need to analyse it. The need to make data available to a wider audience has also been a driver for change. The move to the cloud has made it easier for companies to share data and to make it accessible to a wider range
Step 4: Fine-Tuning Section After fine-tuning the model, what was the response of the model to your domain-specific input in the model_finetuning.ipynb file?
